## BASSOLID-SYSTEM

**9** Our (patented) BasSolid system has been designed that it is adjustable in width, suits 6-20 mm Ø tubes and even fits tapering carriers with heightened backs. The system is pre-mounted and needs to be adjusted to the carrier width only once. A smartly designed handle activates a clever mechanism which allows the baskets to be clipped to a carrier quickly, firmly and 'blindly'. In addition, the system is provided with a lock. Baskets Catu, Cosa and Cento are equipped with the BasSolid system. The system has been TÜV approved.

## BASEASY CARRIER RACK

**19** BasEasy Carrier Rack: put your luggage carrier bag in front of you! Many times you feel simply safer when you have your laptop or other valuable things in front of you. This rack enables you to hang your favourite Basil single rear bag (or baskets with hanging hooks) in front of you! The rack fits on every BasEasy-system holder.

## PERMANENT-SYSTEM II HANDLEBAR STEM HOLDER/ HEAD TUBE HOLDER

**6** Mount your basket permanent & easy onto your handlebar stem or head tube with our patented "Permanent-system II".

**CARRIER  
EXTENDER  
length**

**20** Basil Carrier Extender length: combines any Basil double bag with a child's seat! This rack is very easily mounted on your luggage carrier. Once mounted, you can combine any Basil double bag in combination with a child's seat! It is really as simple as that! Basil advises to use children's seats mounted on the saddleframe tube.

**CARRIER  
EXTENDER  
width**

**21** Basil Carrier Extender width: combines any Basil single bag with a child's seat! This rack is very easily mounted on your luggage carrier. Once mounted, you can combine any Basil single bag (or basket with hanging hooks) in combination with a child's seat! It is really as simple as that! Basil advises to use children's seats mounted on the saddleframe tube.

## BASIL ADJUSTABLE HOOKS

**16** If you have a luggage carrier with a spring clamp, you will have noticed that baskets with fixed hooks on the bottom, often do not fit because of the variety in luggage carriers. With these clever adjustable hooks (patent filed), you will be able to mount our baskets on many spring clamp luggage carriers. Not available on every basket yet.

# SYSTEMS

## BASEASY-SYSTEM: THE FLEXIBLE SOLUTION!

The BasEasy system is a mounting-system allowing bags or baskets to be clipped to the bike quickly and easily. There are many different versions of the system, so that there is a solution for (nearly) every mounting problem. It also allows you to switch smoothly from the basket for workaday shopping to the front bag in the weekend! There are 7 models: one handlebar stem/head tube holder (1), one handlebar stem/head tube holder with lock (2), handlebar holder (3), springfork holder (4), holder for Dahon folding Bikes (5), handlebar holder EC (17), handlebar stem/head tube holder EC (18).

## BASIL'S INVENTION:

### HOOKS HIDDEN IN ZIPPERPOCKET

The famous zipper pockets at the back of many Basil single bags, cover the hanging hooks inside. Not only, it will bring you more comfort while carrying the bag, but also let your friends doubt whether your very stylish bag is a bicycle bag!

### SOLEN-SYSTEM

**11** A suspension system that consists of slidable hooks which fit 6-16 mm  $\varnothing$  tubes, a locking button, lock and an unique 'rail-disk-system'. The 'disk' is mounted on the luggage carrier stay, the rail which is mounted on the bottom of the bag fits the 'disk' preventing the bag from swinging (patent pending)!
