

# New Standard EN 14344

## INCREASED SAFETY BELTS SECURITY

Compulsory safety belts strength and resistance tests

## IMPROVED BACKREST COMFORT

Higher backrest (minimum height 45 cm / 18"). Greater support for the child

## ENHANCED SIDE CONTAINMENT

More ergonomic seating with higher sideboards (13.5 cm / 5.3" minimum)

## NO DANGER FOR THE CHILD

Angles, edges and shapes must be made in a way to avoid any risks for the child of getting hurt or cut

## CHILDPROOF BUCKLE

The child cannot release the buckle on its own

## FINGERS PROTECTION

No openings allowed in areas accessible to the child's hands. This way, there is no risk that his fingers might get trapped in any openings of the carrier

## FOOTRESTS SETTING

Wide range of the footrests settings in height (15 cm – 5.9")

## WIDER PROTECTION

Wider and safer protection of the child's feet and legs

## INCREASED TESTS STANDARDS

More severe dynamic and static tests on the chassis; **GREATER CONTROL** of materials i.e. non-toxicity and stability with extreme atmospheric agents (cold and heat)

## MANDATORY FOOTRESTS

## FOOT STRAPS
